

Zebra PTT Pro iOS Client Version 1.0.11100

Release Notes – January 2024

Highlights

Zebra is pleased to announce the maintenance release of Zebra PTT Pro Generation 2 iOS client, v1.0.11100. The PTT Pro iOS client is part of the Zebra PTT Pro portfolio, which also includes an Android client and a Desktop for Windows client.

The Zebra PTT Pro iOS client provides the advanced PTT features that PTT Pro is known for, as well as many other features:

- Group and Individual call
- Advanced push-to-talk features
- Contact lists with presence indications
- Locationing
- Secure messaging
- Profile Management

Highlights

Release v1.0.11100 offers

- Rebranding
- Maintenance Updates

Device Support

The Zebra PTT Pro iOS Client is supported on the iPhone, iPod Touch and iPad, iOS version 14 and above. The iPad may also be used; however, the application layout has not been optimized for the iPad.

New in Zebra PTT Pro iOS Client v1.0.11100

Rebranding

WFC PTT Pro is renamed to Zebra PTT Pro.

Support for iOS 17

iOS 17 is supported with this release.

Note: In this release, **IWG** option is not supported.

New in PTT Pro iOS Client v1.0.11094

Implemented Apple's new Push to Talk System UI which is supported from iOS 16.1 and onwards

It contains **Leave** and **Talk** buttons.

Users will be able to take the floor or initiate the PTT calls using the **Talk** button that is available in the **Apple PTT System UI**.

On press of **Leave** button, it will remove the user from the active call session and disable the **Apple PTT System UI**.

Support for iOS 16

iOS 16 is supported with this release.

Note:

- In this release, **Message of the day (MOTD)** parameters (Settings -> Enable MOTD) are not supported.
- **Whole screen as PTT** settings has been removed.

New in PTT Pro iOS Client v1.0.11088

Implement robust authentication method to connect to ZEMS Server

Client uses updated robust authentication method to connect to ZEMS Server. The ZEMS Server version v2.1.22309 is required to work with this client.

New in PTT Pro iOS Client v1.0.11082

Maintenance Updates

New in PTT Pro iOS Client v1.0.11079

Support for Default Callee Configuration via Zebra Workcloud Communication Profile Manager

With Zebra Workcloud Communication Profile Manager Tenant Configuration, an administrator can configure the Default Callee Group for all the users which are part of the site. Please refer to the 'Default Callee Group' setting for Tenant Configuration for Zebra Workcloud Communication Profile Manager for more details.

Support for Site Change with Zebra Workcloud Communication Profile Manager

The client will now allow Zebra Workcloud Communication Profile Manager users to change site dynamically during login. Please refer to the 'Site Selection' setting for Tenant Configuration for Zebra Workcloud Communication Profile Manager for more details.

Zebra Workcloud Communication Enterprise Messaging Service Support

Zebra Workcloud Communication Enterprise Messaging Service allows enabled users to send messages to other PTT Pro users in customer-defined broadcast regions. Regions may be as small or large as desired, even spanning multiple PTT Pro instances.

Display Traffic conditions in Map View

Client will display live traffic conditions inside the Map View.

Support for iOS 15

iOS 15 is supported with this release.

Note – In this release, 'New Message Alert' setting has been removed.

New in PTT Pro iOS Client v1.0.11067

Support for Zebra Workcloud Communication Profile Manager v4.3

PTT Pro iOS client now supports the latest version of Zebra Workcloud Communication Profile Manager v4.3 with its integrated Profile Client.

Features in Zebra PTT Pro iOS Client v1.0.11052

Some of the many PTT Pro features are listed below. Refer to the manuals listed below for more details.

Group and individual calls

One-to-one and group calls are available. Groups can be predetermined, or the user can build an ad-hoc group.

Advanced push-to-talk features

The PTT Pro advanced push-to-talk features include alert calling, late join, barge calling, priority override, and more.

Contact lists with presence indications

Individual and group contact lists are supported, with presence indications to let the user know when contacts are available.

Locationing

Users can optionally be tracked and displayed on a map, enabling other users to contact those nearest them.

Secure messaging

Individual and group messaging is available.

Profile Management

The PTT Pro iOS client can be configured to receive profile information from the Profile Manager, an optional WFC service. This allows devices to be shared between multiple individuals.

Usage Notes

- As a result of updates to the certificate in the Zebra PTT Pro iOS client, customers using the PTT Pro iOS client must upgrade to this version (1.0.11082) before March 31st, 2023, to avoid impact.
- The PTT Pro Generation 2 iOS client requires iOS 14 or higher. Manual or email installation is supported. Refer to the installation manual for more details.
- You must uninstall Generation 1 version of this application prior to installing Generation 2. Using both versions of the application on the same device is not supported.

- Application use is described in the quick start and user guides listed below.
- Zebra PTT Pro iOS Client is not available to following countries from the Apple App Store:
 - China
 - Egypt
 - Georgia
 - Jordan
 - Qatar
 - Pakistan

Known issues

- N/A

About Zebra PTT Pro

Workcloud Communication PTT Pro connects your workforce with enterprise-class instant PTT and secure messaging services that support text, images, audio, and video. Now, workers can talk to any user or group with the press of a button — no more waiting for a callback or phone tag. You can barge into an ongoing PTT call in the event of an emergency — and you can set a Priority Caller level so that specific users will always override any call in progress. With User Presence information, workers can identify who is available before placing a call or sending a text, audio, or video message to ensure an instant connection. And unlike consumer cellular standard text message services, all text messages are encrypted in-transit, meeting enterprise security needs. Services are available over cellular* and Wi-Fi networks, so they are always available to your workers, regardless of where they are located. Visibility into the status of every user provides workers with the intelligence to select the best contact that is available to provide an answer, right now. And deployment couldn't be easier — just subscribe to these Workcloud Communication PTT Pro cloud-based services and your workers are up and running. Get the power of one with Workcloud Communication. One solution that provides enterprise-class PTT and secure messaging. One connected workforce. And all the communication services your workers need — data, voice and multi-media messaging — all on a single device.
